Install GreenDoor Profiles on MacBook Air

- 1) Using any browser other than Safari, click this link - [GREENDOOR 2017](#) to download the Mobile Configuration file. Do not run the program at this step.
- 2) Click the Wi-Fi symbol, , then click **Turn Off Wi-Fi**
- 3) Select **System Preferences**
- 4) Select **Profiles**
- 5) Look for **GreenDoor Configuration** under **Profiles**. If it does not exist, continue to step 8. If it exists, select it and click the minus icon , located at the bottom left of the page.
- 6) Click **Remove** to confirm.
- 7) Enter your laptop Username and **Password** and click **OK**.
- 8) Close **System Preferences**
- 9) Click the Search icon  found in the upper-right corner of the screen
- 10) Type "GreenDoor 2017", and Press **Return** (Enter)
- 11) Double-Click **GreenDoor 2017.mobileconfig**
- 12) Click **Show Profile** and visually confirm the following text is displayed: "Deerfield Academy ITS Verified"
- 13) Click **Continue** two times
- 14) Type your DA Network Username and **Password**, then click **Install** twice
- 15) Type your Laptop Password, then click **OK**
- 16) Close the window
- 17) Click the Wi-Fi symbol , then select **Open Network Preferences**
- 18) Click **Advanced**
- 19) Drag **GreenDoor** to the top of the list, then click **OK**, then click **Apply**
- 20) Close the Window
- 21) Click the Wi-Fi symbol , then **Turn Wi-Fi On**
