

**Set Up Secure Print  
on a MAC**

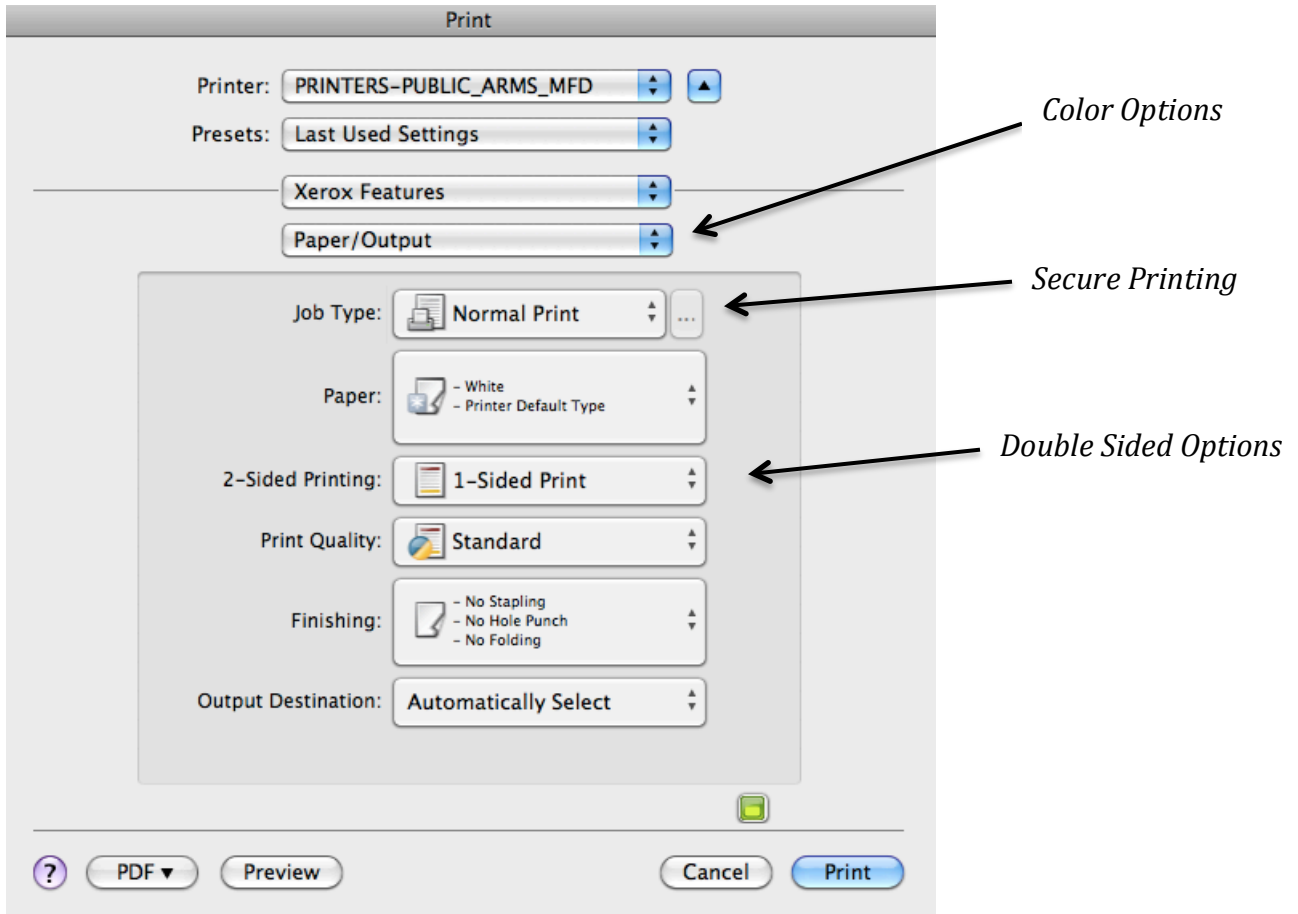

1. From the print window, click the drop down arrow for the Copies & Pages menu.
2. Select **Xerox Features**.

**Set Up Secure Print  
on a MAC**

3. In the next window, select the Job Type drop down arrow and choose **Secure Print**.

4. You will then be prompted to select your new printing passcode. Type it in a second time to confirm and click **OK**.
5. Note that this is the same window you use to set double sided or color options.
6. When you have selected all your options, you can click **Print**, or you can save your options for next time.
7. To save your options, select the drop down arrow in the Preset window that says "Last Used settings".
8. Choose **Save As**.
9. Give your settings a name and click **OK**.
