

## **Following are the steps to download and install the GlobalProtect Client VPN**

- Open Chrome and browse to **<https://rac.deerfield.edu>**
- Login with your DA username and password.
- Click to download either the Windows 64 bit or Mac 32/64 bit version.
- When the download is complete, click **GlobalProtect64.msi or.dmg** in the lower left corner to open.
- Continue with appropriate steps below for either **Mac** or **Windows**:
  - **WINDOWS**: Click **Next** 3 times, then click **Yes**, then click **Close**.
  - After installation, the GlobalProtect window will pop up.
  - In the portal address field, type in **rac.deerfield.edu** and click **Connect**.
  - Type in your DA username and password and click **Sign In**.
  - You are now connected to GlobalProtect.
  - Double click on the **Map My Drives** icon on your desktop to connect your drives.
  - To disconnect, click the Globe icon in the lower right corner of your screen and click **Disconnect**.
- **MAC**: Click **Continue**, select Hard Drive, Continue.
- Be sure that **Global Protect** is checked. Then, Click **Continue**.
- Click Install
- Enter local user password.
- Click on the Global Protect icon in the menu bar and enter **rac.deerfield.edu** portal address field.
